DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 16 is rejected under 35 U.S.C. 103(a) as being unpatentable over
Sunkara et al. (US 6,523,032)

As per claim 16, *Sunkara* teaches a host comprising:

- a processing unit; and
- a memory interface module to permit accesses by the host computer (client) to a logical entity to be made to one a first physical storage location for a read requests (Slave database server, 103, 104, or 105) and to a different second physical storage location for a write requests (Master database server, 102), to prevent accesses by the host computer to the logical entity from being made to the second physical storage location for the read requests (reads are done by Slave databases, not Master database), and the prevent accesses by the host computer to the logical entity from being made to the first physical

storage location for write requests (Slave database server, 103/107, 104/107, or 105/107), wherein the first and second physical storage locations are different. (Abstract, col. 4, lines 9-col. 6, lines 1-60)

Sunkara teaches a system including a master database server for servicing both read and write operations and a slave database server for servicing only read-only access to a user application. It would have been obvious to one of ordinary skill at the time the invention was made that in order to prevent a consistency problem all updates are sent to the master database where the first and second physical storage locations are different.

Allowable Subject Matter

Claims 1-15 and 17-29 are objected to as being dependent upon a rejected base claim, but would be allowable if added to the rejected independent claim.
